# Class Objectives

Like many professions, local, state, and federal laws affect the work that planners do. This course is designed to provide the practicing planner with a background in the essentials of land use and environmental law, with an emphasis on recent Washington State developments and lessons from other states.

This class has five goals.

1. After completing the class, the students will understand the source of laws, regulations, and legal principles and how they are applied to the specific situations planners face in their profession.
2. After completing the class, the students will be able to spot legal issues as they come up in their work. The students will know what issues require further consultation with lawyers.
3. Both historically and currently, the law has not treated all equally. After completing the class, the students will be able help to address current injustices in the laws affecting the practice of planning and to contribute to the adoption and implementation of laws and regulations that advance the principle of equal justice for all.
4. After completing the class, the students will learn that the law changes. The students will also learn that planners can contribute to positive change in the law through the development of new planning techniques and practices. This is particularly important as new classes of planners will experience dramatic change in their professional lives due to changes in technology, society, institutions, and the environment.
5. To learn from the other students. Graduate students bring their life experiences and technical expertise to class. By discussing laws and cases in class and working together in a team, we can all benefit from the student experiences and expertise.

# Readings

The class has one required textbook:

Daniel R. Mandelker, *et al.*, *Planning and Control of Land Development: Cases and Materials* (Tenth Edition: 2020, Carolina Academic Press).

The textbook is available at the University Bookstore and elsewhere. Be sure to purchase or rent the correct edition, the Tenth Edition from 2020. Additional assigned readings will be available in PDF format on the class canvas website. Specific reading assignments are indicated on the schedule below; you are expected to complete each reading before the class for which it is assigned.

# Assignments and Grading

The following will determine your grade for the class:

- Midterm Project: 40 percent
- Final Exam: 45 percent
- Case Briefs: 10 percent
- Class Contribution: 5 percent

## Midterm Project

The midterm is a group project including a written report and a Zoom presentation. Team assignments and project instructions will be given in class during Week 3. Before then, you will be asked to complete a brief survey of skills and experiences to help the instructors create balanced teams. The project will require the creation of a deliverable document and a presentation to the instructors. Your work will be based on concepts and cases discussed in class through Week 5. Teams will present their work during Week 6 class periods. Documents from all teams will be due at midnight on Sunday, May 2.

## Final Examination

The final exam will be on Tuesday, June 8<sup>th</sup>, 8:30 – 10:30 am. During the examination, you will be allowed to refer to your textbook, class handouts including PowerPoint presentations, and case briefs that you have produced. Additional details on the final format will be provided in May.

## Case Briefs

All students are required to submit three case briefs. A case brief is a short (1-page) summary of the key issues and implications of a court case. Specific guidance on the format and expectations for case briefs will be provided in class. You may not brief *Penn Central* or *Pennsylvania Coal v. Mahon*, and you may not brief cases from reading assignments marked “skim.” Otherwise, you may choose any case from the readings assigned within the date ranges specified for each of the three briefs:

- Case Brief #1, from cases assigned for April 5 – April 14 (other than *Pennsylvania Coal v. Mahon*).
- Case Brief #2, from cases assigned for April 19 – April 28.
- Case Brief #3, from cases assigned for May 10 – May 26.

**Due dates:** Case briefs are due at midnight on the evening *before* the class in which the case is assigned. Briefs submitted for cases that have already been discussed in class will not be accepted.

## Additional Policies

### Remote Learning

The instructors understand that remote learning is different and creates challenges for students that are both common to all students and unique to each student. The U of W has resources available to help students during this period of remote learning classes. The instructors also want to help all students learn during this time of remote learning. If you have any questions or need assistance, please contact the instructors.

The class sessions will be recorded. While attending the class sessions in real time is preferred, if you cannot attend a session please review the recorded version of the class.

## Class Contribution

Class contribution will be evaluated based on your active engagement in class: listening attentively to instructors, guest speakers, and your peers; participating in discussions; demonstrating your understanding of readings; asking for clarification; raising relevant issues; etc. Although our class is being held remotely, you are still encouraged and expected to participate.

In classes without a panel or guest speaker, there will be small group breakout sessions to discuss a question related to the class topics. Everyone is requested to participate in the small group breakout.

## Class Attendance, Readings, and Discussion

We expect class attendance and participation in class discussion to the extent permitted by remotely conducted classes. We also expect you to complete assigned readings on time. In comparison to other course work, the readings may seem substantial from time to time, and it will be wise to plan your study schedule accordingly.

We highly encourage forming a study group with a few other people in order to discuss the readings, share different points of view on the cases, and/or proof each other's case briefs before turning them in. Remember that aside from the midterm project, you are responsible for submitting your own individual work, and using only the work that you have produced (in addition to class handouts and the textbook) during the final examination.

## Academic Conduct

The University of Washington has a set of guidelines on how to respond to suspected cases of academic dishonesty, or "cheating." These cases include plagiarism in written assignments (copying directly from texts or another student's work) and referring to contraband or getting help from someone else in testing situations. You should familiarize yourself with these guidelines. If you have any questions about the boundary about what is or is not acceptable, ask the instructor or the TA to clarify.

As a student at the University of Washington you are held to "high standards of academic and professional honesty and integrity" by the Student Conduct Code. The Student Conduct Code can be read on the University's homepage at: <https://www.washington.edu/cssc/for-students/student-code-of-conduct/> [\(https://www.washington.edu/cssc/for-students/student-code-of-conduct/\)](https://www.washington.edu/cssc/for-students/student-code-of-conduct/)

The University has a license agreement with Turnitin, an educational tool that helps prevent or identify plagiarism from Internet resources. Your instructor may use the service in this class by requiring that assignments must be submitted electronically to be checked by Turnitin. The Turnitin Originality Report will indicate the amount of original text in your work and whether all material that you quoted, paraphrased, summarized, or used from another source is appropriately referenced.

# Students with Disabilities

Students that believe that they may have any form of a disability should speak with the instructor as early as possible and consult the University's resources for students with disabilities:

<http://www.washington.edu/students/drs/> [\(http://www.washington.edu/students/drs/\)](http://www.washington.edu/students/drs/)

# Readings and Schedule

This class schedule and assigned readings may be amended from time to time; please check the class website for updates. Textbook pages refer to Mandelker, *et al.*, *Planning and Control of Land Development* (10th ed).
