Core credits: 49

RESTRICTED ELECTIVES (see restricted electives handout for courses meeting these requirements)

<u>Course Title</u>	<u>Quarter Taken</u>	<u>Credits</u>
Advanced Methods	Variable	3
Urban Development/Economics	Variable	3

Restricted electives credits: 6

UNRESTRICTED ELECTIVES

<u>Description</u>	<u>Credits</u>
Typically 5 or 6 courses, should be in area of specialization	17

Total Credits Required for the MUP Program: 72

<u>Term</u>	<u>Description</u>
Specialization:	A specialization is required of all students. Specialization areas include urban design; land use and infrastructure planning; transportation planning; real estate; historic preservation planning; environmental planning; and an individualized specialization option. For students enrolled in a concurrent degree, the other field is considered as the specialization.
Internship:	Professional experience is highly encouraged prior to completion of the degree program, although not required.
Prerequisites:	Starting with the entering class of Autumn 2015, the MUP program will no longer require prerequisites. However, a solid understanding of basic economic principles is essential for all planners. Therefore, students should be aware that they are expected to have a foundation in microeconomics for certain courses and thus should be adequately prepared if they plan to take such a course.
